# Earth System Science for the Baltic Sea region

**Baltic Earth**  
Earth System Science for the Baltic Sea Region

[www.baltic.earth](http://www.baltic.earth)

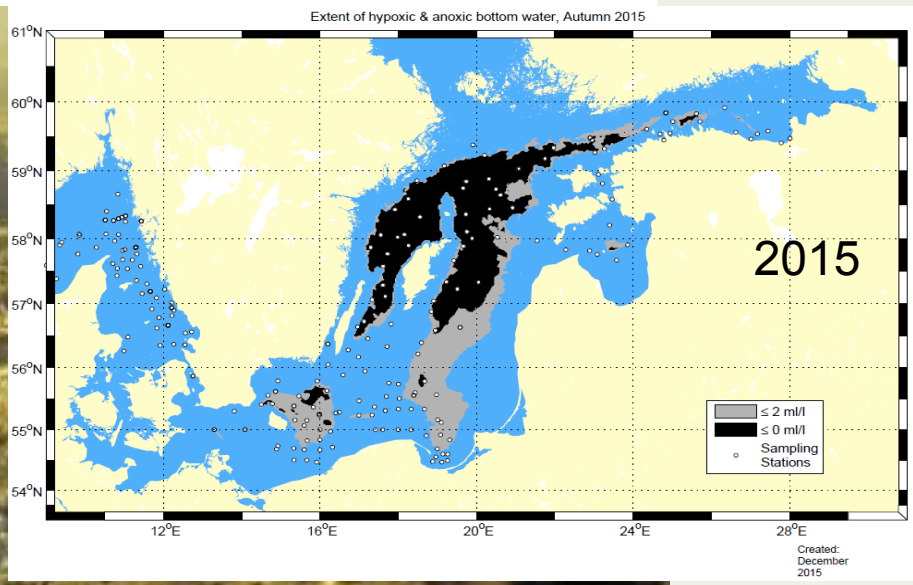

*Earth system science treat the Earth as an integrated system and seeks a deeper understanding of the physical, chemical, biological and human interactions that determine the past, current and future states of the Earth*

# Baltic Earth working groups on modeling

- 1) Coordinated experiments with coupled atmosphere-ocean models (5 institutes with 5 RCSMs)
- 2) Assessment of scenario simulations (completed, 6 institutes, 21 scientists)
- 3) Assessment of ocean models (proposed)

SMHI's regional  
climate models:

RCAO

Döscher et al.,  
2002)

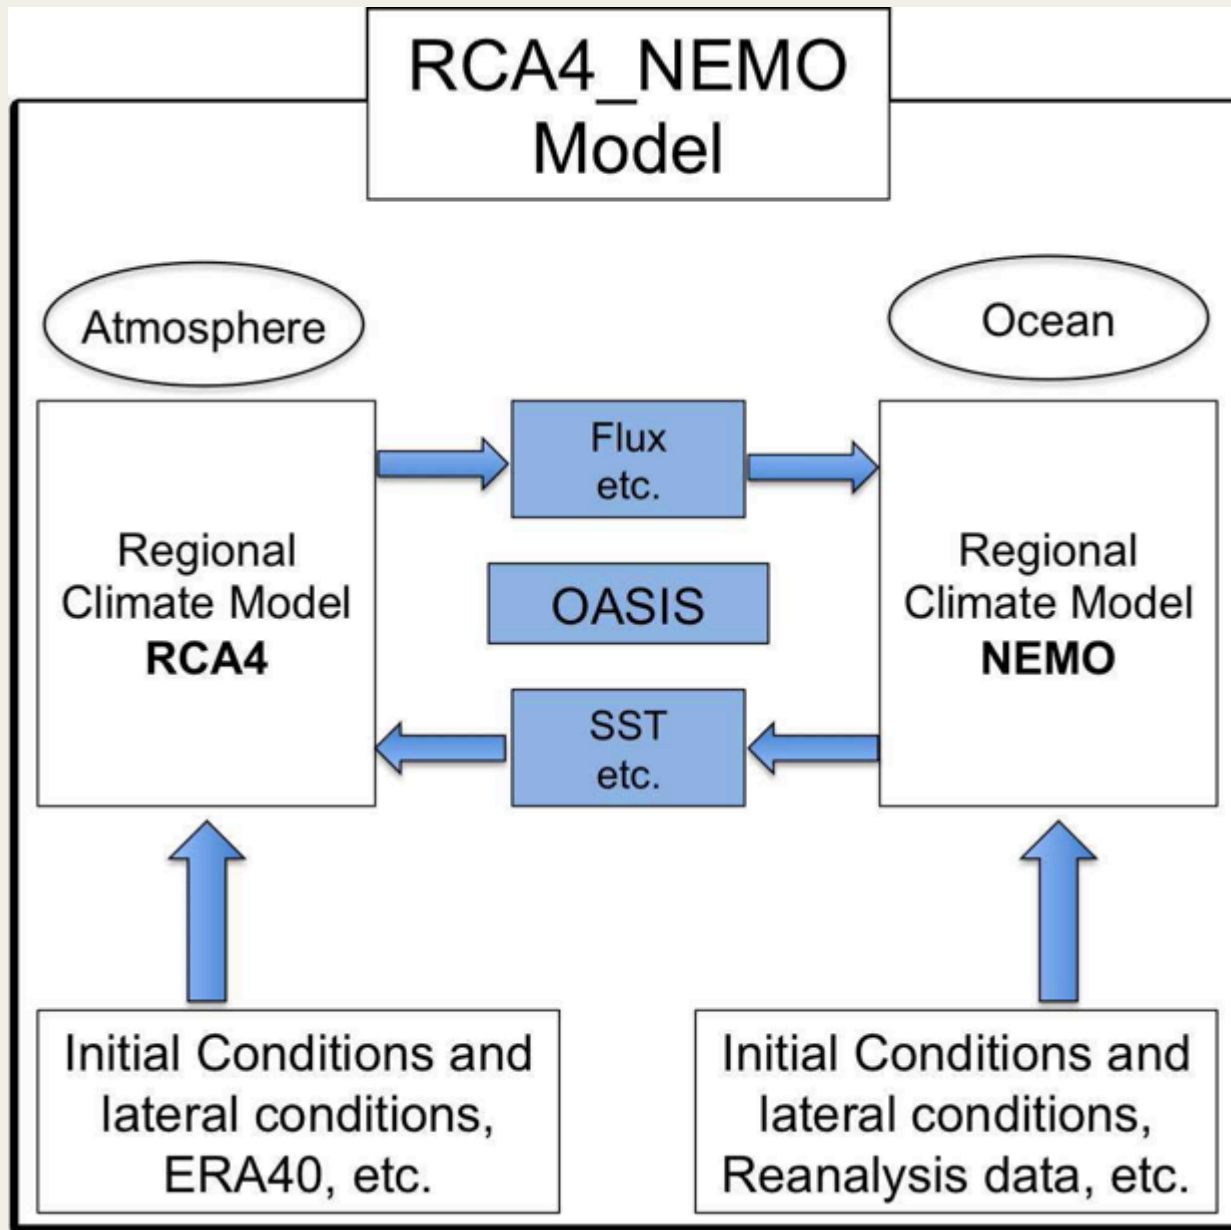

RCA-NEMO

(Source:

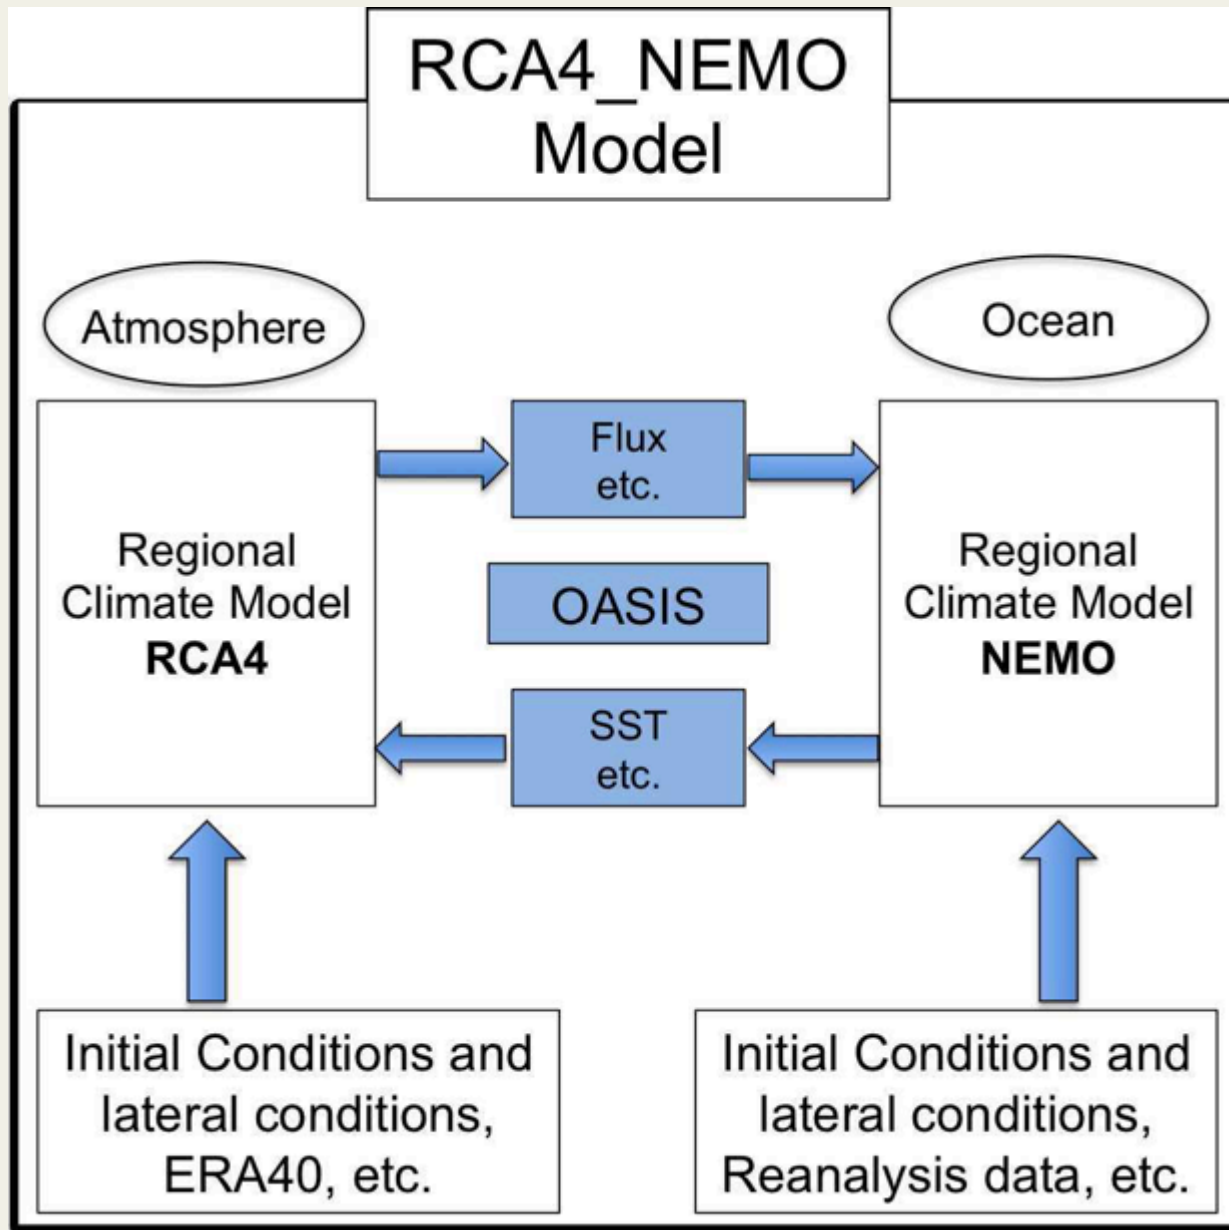

Wang et al., 2015)

RCA4 domain and orography

Additional components:

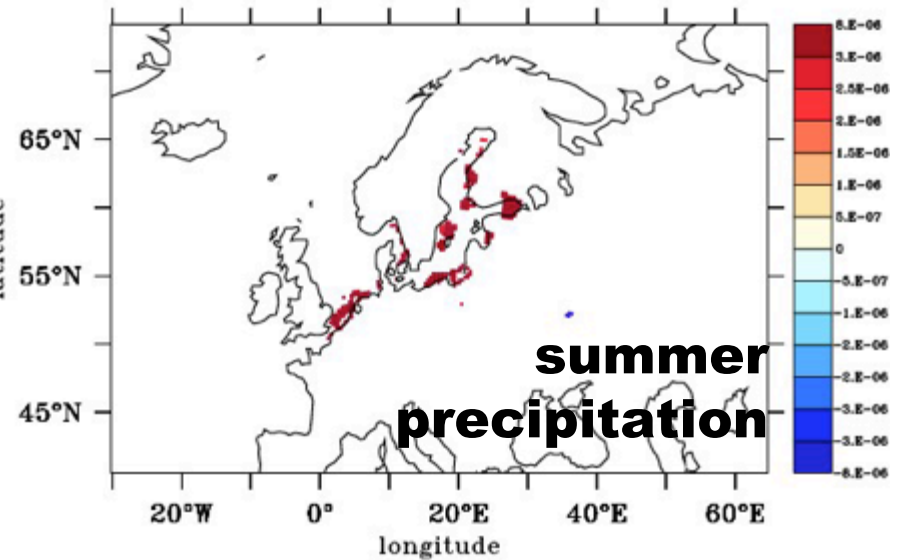

- sea ice
- waves
- marine biogeochemistry
- (marine food web)
- sediments
- land surface and hydrology
- lakes
- (dynamic land vegetation)
- (atmospheric chemistry)

## Baltic Sea: future projections

- 7 different global climate models
- A1B and A2 scenarios, RCP4.5 and 8.5
- 3 realizations
- 3 regional climate model (RCAO, CLM, RCA-NEMO)
- 3 hydrological models
- 6 Baltic Sea physical-biogeochemical models
- 10 nutrient load scenarios: BSAP (- 25...- 30%) to BAU (+ 40%)
- Total: 29 scenario simulations

# Conclusions

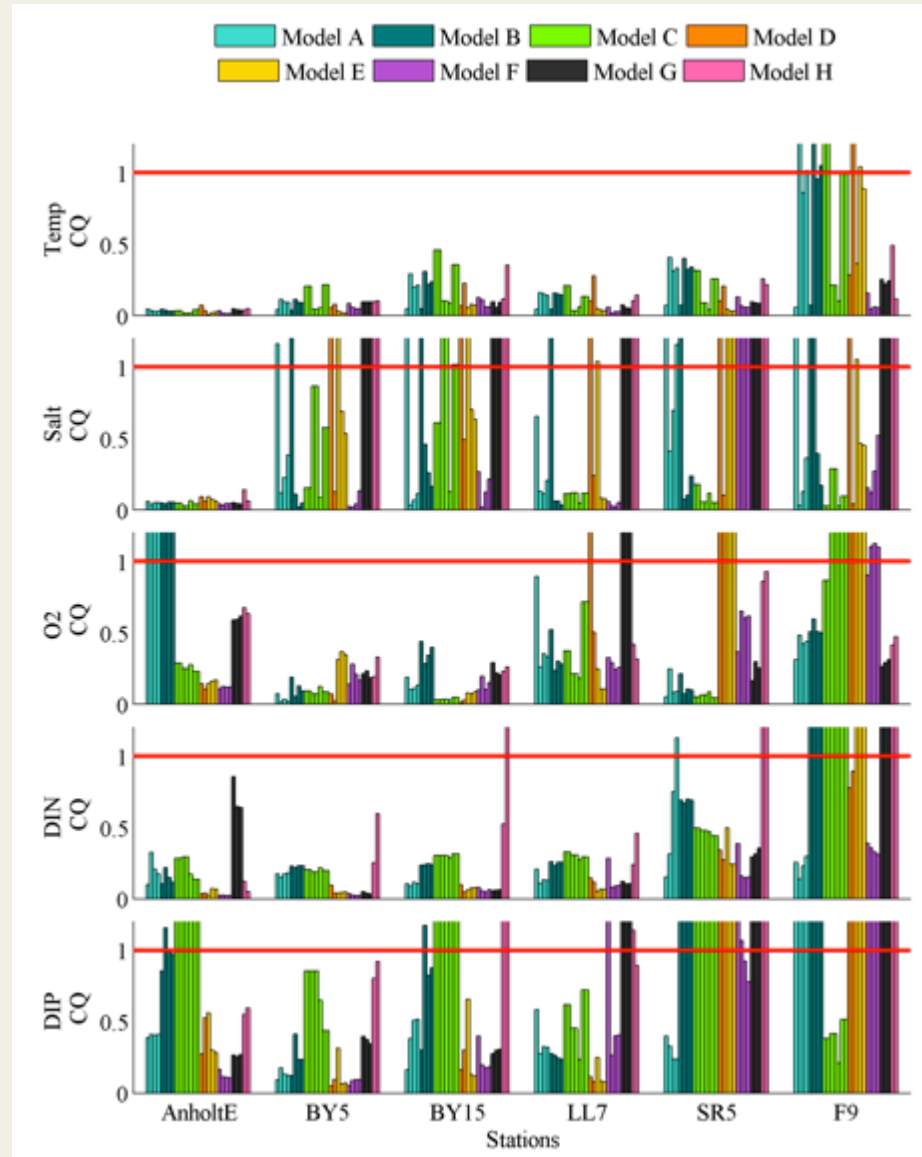

- Baltic Earth integrated modeling systems are powerful
- Challenges: resolution, model biases, e.g. 1) water balance is not closed, 2) unknown evolution of nutrients in the soils on long time scales
- Assessments are needed

Thank you for your attention!
